AMENDMENTS TO THE CLAIMS:

Claims 1-7 and 15-28 were pending at the time the Office Action was issued.

Claims 1, 15, and 18 have been amended herein.

Claims 1-7 and 15-28 remain pending

1. (**Currently Amended**) A method for augmenting an <u>employers</u> internal library with published submissions to a technical society, the method comprising:

locating an abstract for a published submission on a technical society website;

downloading the abstract for the published submission to a machine readable memory medium at a first <u>searchable library website</u> ~~address~~;

locating the published submission on a technical society website;

downloading the published submission to the machine readable memory medium at a second <u>searchable library website</u> ~~address~~; and

embedding a hyperlink to the second <u>searchable library website</u> ~~address~~ into the abstract, the hyperlink being configured to display the published submission when invoked<u>, wherein the first and second searchable library websites are exclusive to the employer</u>.

2. (**Original**) The method of Claim 1, wherein locating the abstract is based upon a submission approval procedure internal to an organization.

3. (**Original**) The method of Claim 2, wherein locating the submission is based upon a submission approval procedure internal to an organization.

4.   **(Original)**   The method of Claim 1, wherein the downloading of the abstract includes indexing the first address to allow searching for the abstract.

5.   **(Original)**   The method of Claim 4, wherein the searching is by keyword.

6.   **(Original)**   The method of Claim 4, wherein the searching is by subject.

7.   **(Original)**   The method of Claim 4, wherein the searching is by author.

8.   **(Canceled)**.

9.   **(Canceled)**.

10.   **(Canceled)**.

11.   **(Canceled)**.

12.   **(Canceled)**.

13.   **(Canceled)**.

14.   **(Canceled)**.

15.   **(Currently Amended)**   A system for augmenting an <u>employers</u> internal library with published submissions to a technical society, the method comprising:

a first means for locating an abstract for a published submission on a technical society website;

a second means for downloading the abstract for the published submission to a first searchable a machine readable memory medium at a first <u>searchable library website</u> ~~address~~;

a third means for locating the published submission on a technical society website;

a fourth means for downloading the published submission to the machine readable memory medium at a second <u>searchable library website</u> ~~address~~; and

a fifth means for embedding a hyperlink to the second <u>searchable library website</u> ~~address~~ into the abstract, the hyperlink being configured to display the published submission when invoked<u>, wherein the first and second searchable library websites are exclusive to the employer</u>.

16.   **(Original)**   The system of Claim 15, wherein locating the abstract is based upon a submission approval procedure internal to an organization.

17.   **(Original)**   The system of Claim 16, wherein locating the submission is based upon a submission approval procedure internal to an organization.

18.   **(Currently Amended)**   The system of Claim 15, wherein the downloading of the abstract includes indexing the first <u>searchable library website</u> ~~address~~ to allow searching for the abstract.

19.   **(Original)**   The system of Claim 18, wherein the searching is by keyword.

20.   **(Original)**   The system of Claim 18, wherein the searching is by subject.

21.   **(Original)**   The system of Claim 18, wherein the searching is by author.

22.   **(Previously Presented)** Computer readable media including one or more program modules configured to cause one or more processors to perform the method of claim 1.

23.   **(Previously Presented)** Computer readable media including one or more program modules configured to cause one or more processors to perform the method of claim 2.

24.   **(Previously Presented)** Computer readable media including one or more program modules configured to cause one or more processors to perform the method of claim 3.

25.   **(Previously Presented)** Computer readable media including one or more program modules configured to cause one or more processors to perform the method of claim 4.

26.   **(Previously Presented)** Computer readable media including one or more program modules configured to cause one or more processors to perform the method of claim 5.

27. **(Previously Presented)** Computer readable media including one or more program modules configured to cause one or more processors to perform the method of claim 6.

28. **(Previously Presented)** Computer readable media including one or more program modules configured to cause one or more processors to perform the method of claim 7.
